Technical Skills

- ESRI Software (GIS Applications)
[e.g., ArcGIS Pro, Full Enterprise, AGOL, ArcHub etc.]
- SQL – Certification Obtained 6/28/2024
- SQL Server, SSMS, PostgreSQL
- Advanced Python
- GPS Pathfinder Office
- SRA Court Records
- Cityworks & EnerGov
- CivicPlus
- Microsoft Office Products

Projects

- Executed migration to full ArcGIS Enterprise
- Completed full integration of the County GIS network into the FLEX 911 dispatch platform.
- Developed an adaptable Python parsing script for the NG911 Project
- Developed a complex SQL query in Real Estates database, enabling seamless integration with parcel data.
- Developed an official digital Zoning book within Warren County

Education

BACHELOR'S DEGREE IN
GEOGRAPHIC SCIENCE
DUAL CONCENTRATION:
APPLIED GEOGRAPHIC SCIENCE
(AGIS) & ENVIRONMENTAL,
CONSERVATION, SUSTAINABILITY, &
DEVELOPMENT (ECSD)

James Madison University

GIS professional with a proven ability to deliver solutions that enhance operations and decision-making. Skilled in blending technical expertise with problem-solving and communication to support diverse organizational needs. Thrive in diverse settings, bringing initiative, leadership, and innovation to every environment.

Experiences

County of Warren

August 2023 – Present

GIS Administrator (August 2025 – Present)

- Lead and execute the migration of the County's GIS environment from SQL Server to Postgres as part of the full enterprise deployment, ensuring system integration and optimization.
- Oversee and maintain the County's enterprise GIS environment hosted on Postgres, including versioning workflows, routine backups, and managing all spatial data to ensure data integrity, system reliability, and efficient operations.
- Develop and implement automated workflows, Python scripts, and Standard Operating Procedures (SOPs) to optimize GIS tasks, improve efficiency, and streamline maintenance.
- Produce professional-grade maps, spatial analyses, and data visualizations for internal stakeholders, public outreach, and long-range planning.
- Update and manage the Emergency Services Network (EsiNet, NG911, 911-Net, First Due), aligning address and road data with VDEM/VGIN 911 standards.
- Provide GIS consultations and technical support to County departments, ensuring effective integration and use of GIS in their operations.
- Lead the administration of the County's permitting system (EnerGov), configuring GIS-integrated components via the GIS REST Service.
- Mentor GIS interns, fostering technical development and professional growth, ensuring succession planning for the GIS Program.
- Serve as the County's Road Administrator, interpreting local and state codes, while managing the official road name database and enforcing naming conventions.
- Developed and launched a modernized ArcGIS Hub site, housing interactive web applications for both internal use and public engagement.
- Manage the Motorola Solutions FLEX System (911-dispatch GIS-integrated platform), ensuring seamless alignment of spatial data with emergency response operations.
- Assess and verify addresses for new development using Trimble GPS units and interpreting local codes, ensuring compliance with addressing standards.
- Procure and manage hardware/software vendor contracts, ensuring competitive bids and adherence to technology standards.
- Expertly utilize ArcGIS Pro and its extensions to perform advanced spatial analysis and optimize workflows.

GIS Coordinator (August 2023 – August 2025)

- Performed full GIS Administrator responsibilities prior to official promotion.

Roanoke County

January – August 2023

GIS Specialist – Development Services

- Developed and maintained GIS maps, data visualizations, and web content to support departmental initiatives and inform County leadership.
- Managed stormwater GIS datasets in compliance with the MS4 permit requirements, maintaining DEQ reporting standards through data collection, quality assurance (Crystal Reports), and integration with Cityworks.
- Supported field data collection efforts using Cartron GNSS receivers and survey tools to map MS4 assets and proposed civil engineering projects.
- Researched deeds, plats, and mylar plans to update GIS attributes accurately; maintained and enhanced GIS content on the department's CivicPlus site.
- Provided technical support and training for staff, serving as liaison between the department and the IT GIS division; troubleshooted and optimized Cityworks for inspector workflows.

Shenandoah National Park

May – December 2022

Trails Laborer – Certifications: SAR, ROHVA, & Sawyer

- Maintaining 315 miles of trails within the central & southern district.
- Used a handheld GPS unit during SAR operations & boundary marking.
- Trained with fish biologist analyzing sections of streams for sustainability of aquatic life.

Harrisonburg Public Utilities

March – May 2022

Unpaid GIS Intern

- Assisted GIS technician with utility data management, map creation, and troubleshooting during integration and analysis.
- Conducted field surveys with Sokkia GCX3 GNSS receiver to locate assets for mapping.
- Utilized ArcMap 10.8.1, AutoCAD, and Cityworks to support GIS workflow
